How to create your video with scrollx

A free site allows you to convert video from webm format to mP4 format Click on the following button:

Drop your video file in webm format into the "Choose File" window Then click on the "START" button to start your conversion to MP4 format Then retrieve your video in MP4 format

Left and right text boxes

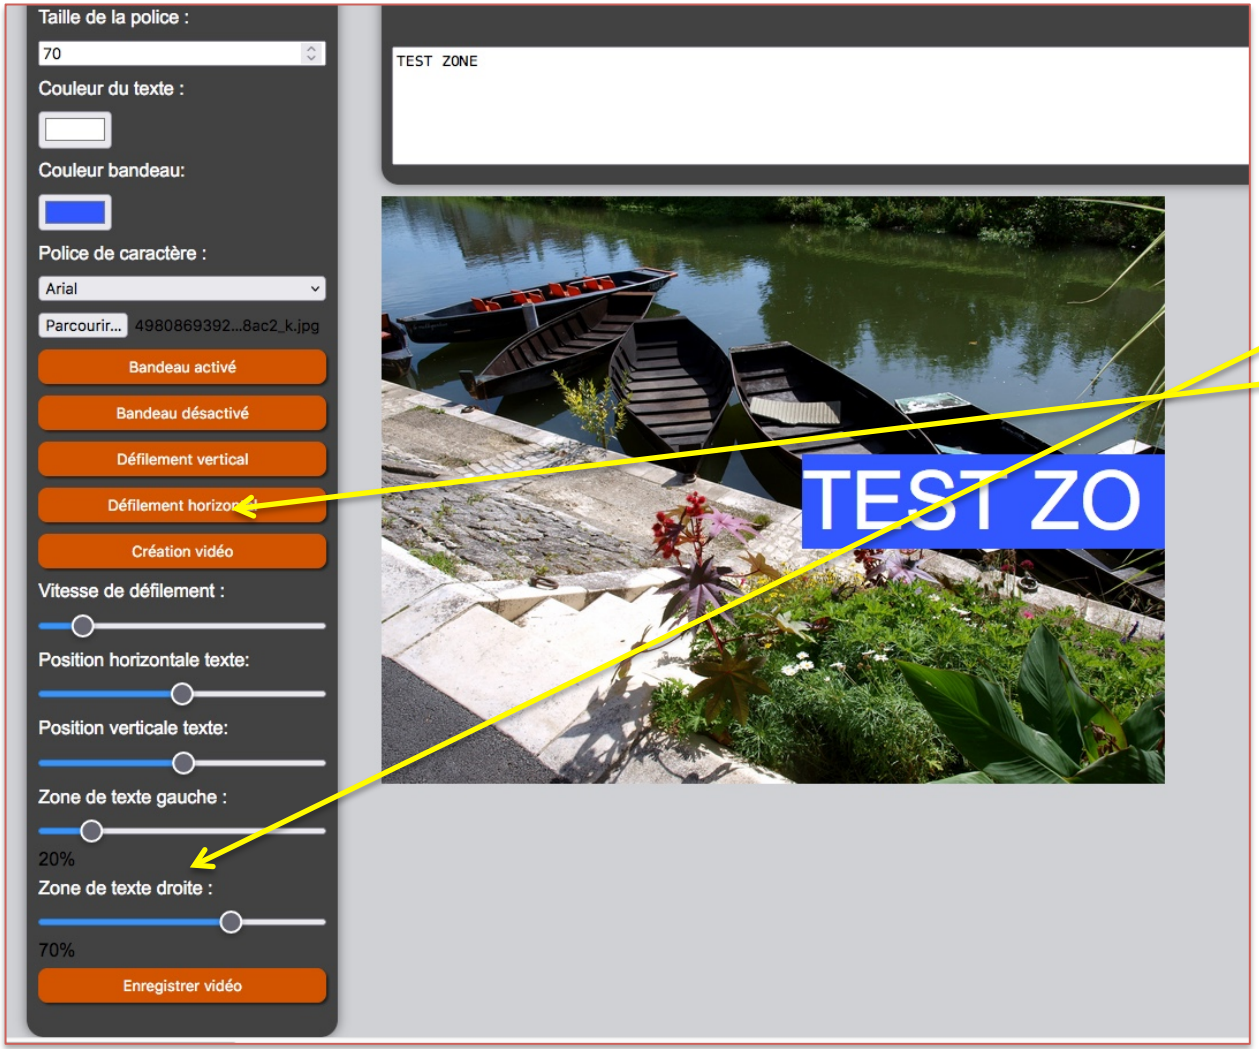

ZONE DE TEXTE

Step 1:
Enter your text and click the 'Horizontal Scroll Preview' button.'

Step 2:
First, move the 'Left Text Area' slider (important) to the left.
The text will stop scrolling at 20% of the left margin.
Then, move the 'Right Text Area' slider. The text will begin scrolling
at 70% of the right margin.
Note: The preview only shows a position indication.

Step 3:
Click the 'Create Video' button Test the result

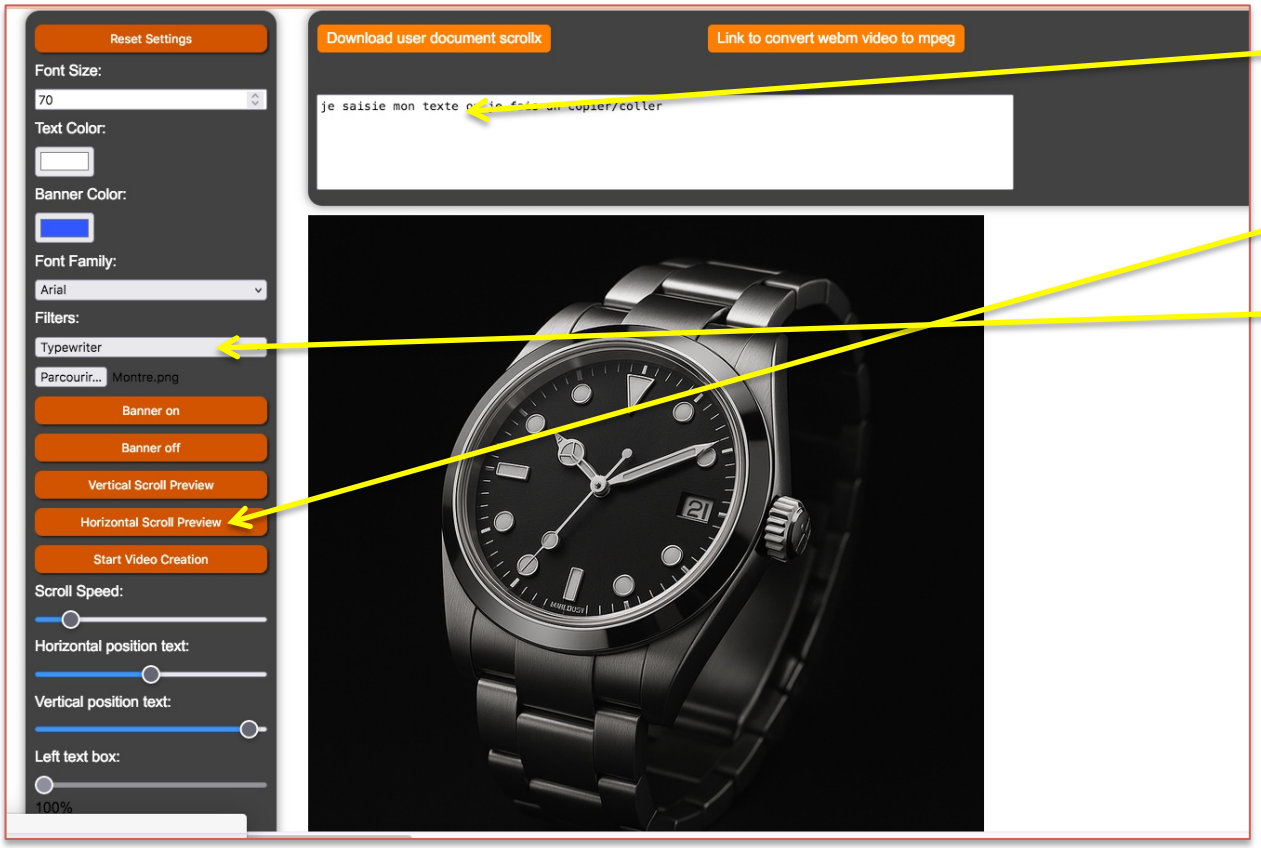

Zones de texte gauche et droite

Refresh settings

Step 1 :
To refresh your settings,
set the 'Left Text Area' and
'Right Text Area' sliders to 100%.
Then click the 'Horizontal Scroll Preview'
button again.
Then, reposition your sliders.

Typewriter Filter

1. Start by entering your text in the text field.

2. Then choose the scrolling mode.

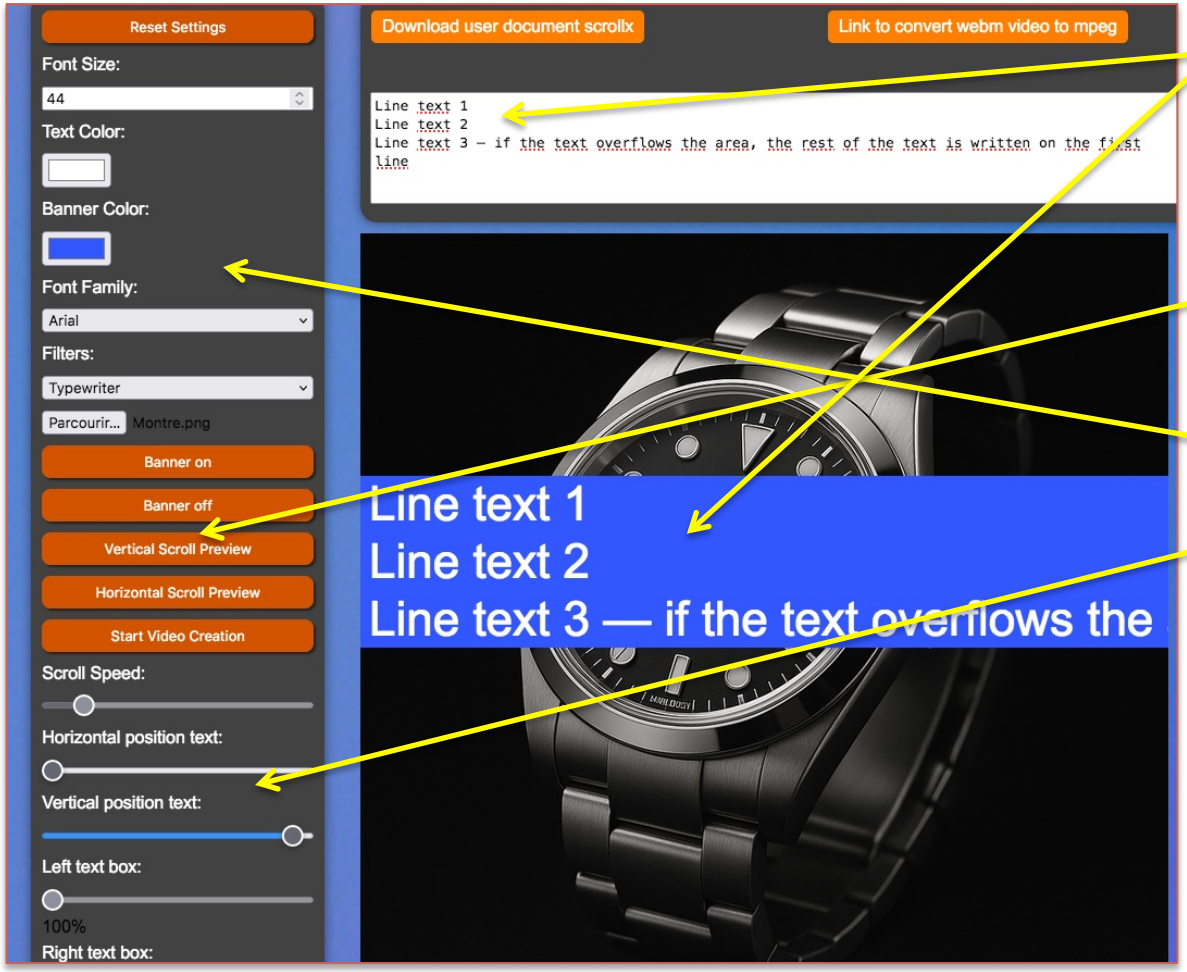

3. Select the “typewriter” option.

4. Adjust your settings such as color, banner, fonts, etc., then click on **Create Video**.

IMPORTANT

The zone functions are disabled when using the “typewriter” option.
Set the scrolling speed **before** selecting the “typewriter” function.

Vertical Typewriter Filter

1. Start by entering your text in the field. (Important) : Add line breaks to define the vertical writing based on the number of specified lines.

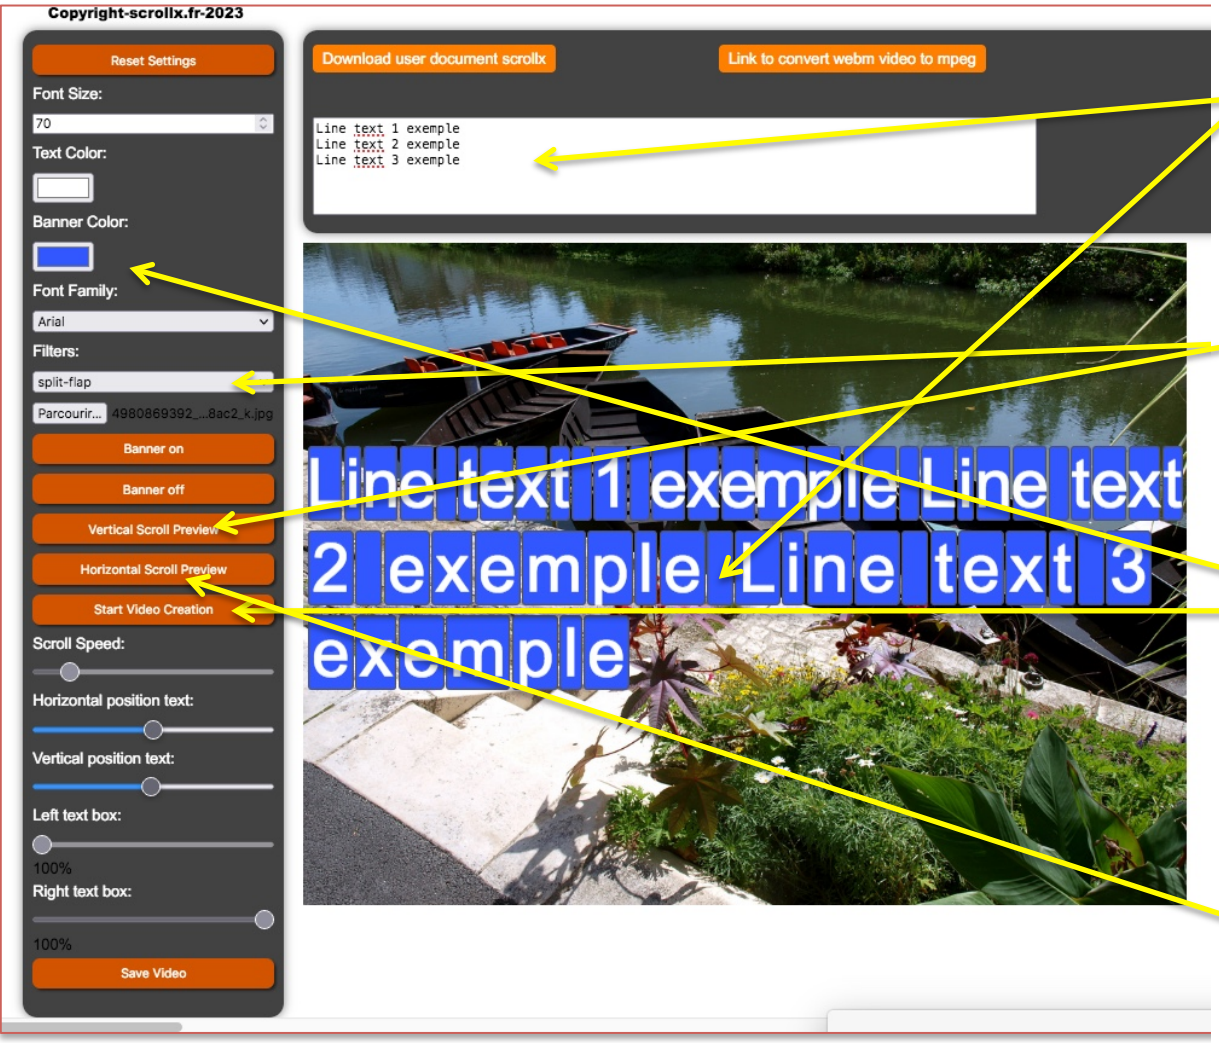

2. Then click on the vertical preview — the text scrolls according to the number of defined lines.

3. Adjust your color, banner, and font settings, etc., then click on “Create Video.”

IMPORTANT

The zone functions are disabled when using the “Typewriter” option.
Set the scrolling speed **before** selecting the “Typewriter” function.
Refresh your browser if needed.

Vertical and Horizontal SplitFlap and Text Reveal Filter and Text Replace

1. Start by entering your text in the field. (Important):
Add line breaks to define the vertical writing according to the specified number of lines.

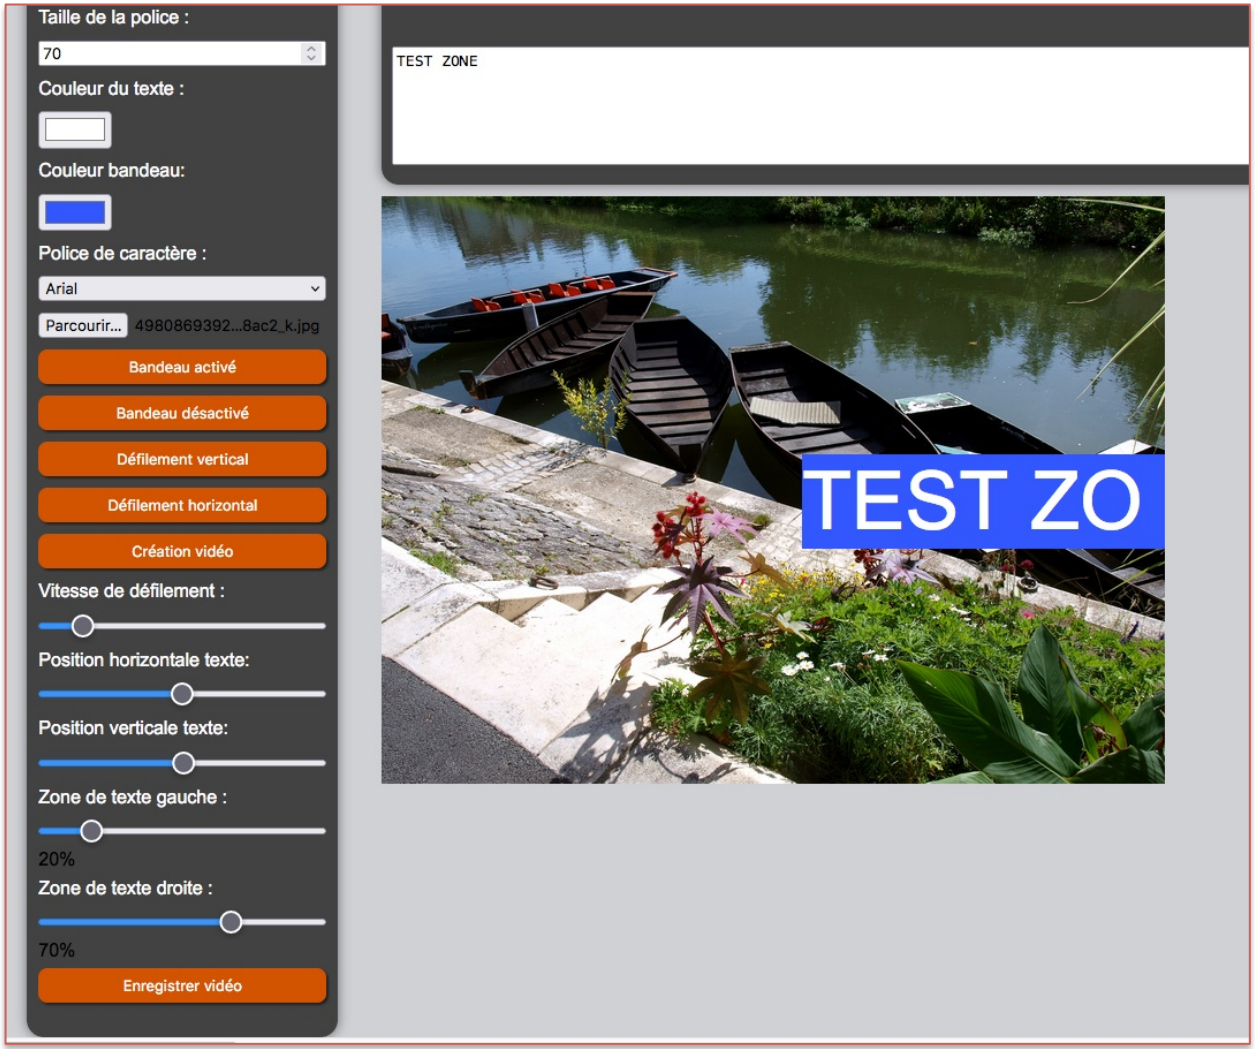

2. Then, click on **Vertical Scroll Preview**: The text scrolls according to the defined number of lines, then select the **“split flap”** filter.

3. Adjust the color, banner, font settings, etc., then click **“Create the video”**. Then create the video to start the recording.
Click **Vertical Scroll Preview** again if you want to return to vertical mode and disable the **“split flap”** filter.

Use the same procedure for the horizontal animation. No line breaks are required; the animation is displayed on a single line.

Refresh your browser if needed.
